

**SECTION XII**  
**PRODUCT STORAGE**

*GMP 12.1 The properly cased goods shall be kept in a clean, dry storage area to ensure that they are protected from excess heat, cold, water, dust, dirt, debris or any other foreign matter. The storage area shall also be kept insect- and rodent-free to prevent product contamination. Filled cartons are not to be stacked so high that container damage results.*

**REASON**

This section is necessary since proper warehousing of the finished product can greatly influence its safety and shelflife.

*Product storage in warehouse*

*Products after labelling and casing*
